

Agronomy Summer Internship

Position Description:

IND HEMP is looking for a dynamic, motivated intern who is eager to learn about industrial hemp agronomy while supporting IND HEMP operations and hemp growers. IND HEMP contracts with growers across Montana and the Pacific Northwest for hemp grain and fiber varieties. The grain and fiber will be processed at our operations in Fort Benton, MT. The Agronomy intern will participate in crop scouting, data collection and compilation, grower relations and support. The internship will provide valuable hands-on experience and insight into industrial hemp production across the state of Montana and into states in the Northwest.

What you will do:

- Assist Agronomist in field scouting, tissue, and soil sampling.
- Collect hemp crop agronomic data, compile, and present findings.
- Call on growers and follow up on inquiries and requests.
- Communicate and collaborate with colleagues.
- Attend meetings and take minutes.
- Perform research at supervisor's request.
- Assist in multimedia documentation and reporting of hemp crop status and updates.
- Operate cellular application for data collection and reporting. Fly our drone to collect aerial observations of the crops.

What you will bring:

- Junior or Senior standing currently pursuing an Ag focused degree.
- Excellent verbal and written communication skills.
- Eager to learn and work with various departments in the company.
- Strong multitasking skills.
- A valid driver's license, clean driving record necessary and an operational vehicle is a plus but not required.
- Ability to travel long distance with overnight stay.
